PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. The article should be considered as a research paper rather than a review article as it contains the experimental results and findings. Whereas in review paper generally, the findings and results of earlier research in collaborated and discussed. 2. Introduction should also give the summary of the paper and work done. 3. The Figures 4, 5, 6, 7, 8a and 8b should be explained in more elaborated manner, so as the results predicted from the figures are more refined and clear to the reader. 4. Figure 2b gives the FTIR peaks, the steepness of peak disappeared between 1250 to 1000 as compared with Figure 2a should be explained briefly. 5. Conclusions should present each important result of the work, hence needs to be elaborated.	
Minor REVISION comments	-	
Optional/General comments	-
