

SDI Review Form 1.6

Journal Name:	Journal of Materials Science Research and Reviews
Manuscript Number:	Ms_JMSRR_43628
Title of the Manuscript:	Recycling and exploitation of Construction and Demolition Wastes as additives in unsaturated polyester composite building and insulation materials; Mechanical and thermal properties Investigation
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The abstract should be recast to reflect the core aim of the study and its conclusion/recommendation be re-written to be clearer. The Introduction Stage needs to improved upon considerably to capture other past studies, more numerous than few stated. These would provide more robust comparison before trying to create gaps that this study wanted to fill. The methodology section can be improved to show the place of source of the waste sources, and the set-up of the experiment can be presented in a better form. The discussion of finding can be improved by show relation of the results gotten with past studies' own, and the Conclusion and recommendation should be directional to the actual results gotten and the recommendations made. Editorial corrections are needed to be compliant by sourcing for English editor specialist.	
Minor REVISION comments	Minor.	
Optional/General comments
