SDI Review Form 1.6

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|---|
| Compulsory REVISION comments | | |
| Minor REVISION comments | <p>This study presented in a very didactic way the psoriasis, demonstrating its pathological and anatomical characteristics and its symptoms.</p> <p>It was also proven that alternative methods can be effective, in this case, acupuncture.</p> <p>The authors demonstrated that the treatment performed in a few weeks may favour the disappearance of the skin lesions. However, since it is a chronic disease, it would be advisable to follow up the individuals who underwent the alternative treatment, for a certain time, to check the progression of the inflammation.</p> <p>For the next studies, it would be interesting to do an investigation with checking the levels of inflammatory and anti-inflammatory cytokines, or quantification of immune cells, etc. In order to verify the effectiveness of the method, at these levels as well.</p> | In fact, these studies are already under way. |
