**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	1) Why was there a gap of one week between the intake of 100mg and 300mg? The effect of aspirin is irreversible and continued until the cell death of the platelets in the vessel.	<ol style="list-style-type: none"> <li>1. It was for the convenience of the participants and the researchers.</li> <li>2. We did not want to stress out the participants since the study required intake of aspirin and then withdrawing of a sample of blood from the participants after each dosage. So a period of one week was maintained between each dosage.</li> <li>3. After each dose of aspirin, we had to monitor the participants for any side effects.</li> <li>4. Most of our participants belonged to the working class. They were able to take time out only once a week to visit our lab for the testing.</li> </ol>
<b>Minor</b> REVISION comments	<ol style="list-style-type: none"> <li>1) What is IHD or PA?</li> <li>2) The 50<sup>th</sup> line (All kava kava compounds~) is difficult to be understood for readers.</li> </ol>	<ol style="list-style-type: none"> <li>1. IHD- Ischaemic Heart Disease PA – Platelet aggregation</li> <li>2. The kavalactones ..... (Changes made in the document)</li> </ol>
<b>Optional/General</b> comments	The point of this study is interest for readers. Therefore, this study will be suitable for this journal.	Thank you for your valuable time Sir/Ma'm. Your comments and recommendations have been noted and incorporated.
