SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>This manuscript most definitely falls within the niche of JOCAMR and their readers' interest. Throughout the manuscript numerous spaces were left out – please insert them where necessary.</p> <p>Line 64: "...adults of <u>more</u> [older?] than..."</p> <p>Line 98: "concerned" [not entirely the correct word to use when the involvement of a nurse is described! May I suggest: "attentive"?]</p> <p>There are many smallish tables in the manuscript – is it at all possible to merge at least some of them? [Create a composite table or two?].</p> <p>Line 195: "will lay" – is a certainty [if it is not, please rephrase].</p> <p>Line 239: remove "current".</p>	
Minor REVISION comments	Please see previous comments. There is really very little to change. All aspects required in a well-planned study was adequately addressed.	
Optional/General comments	<p>Dear Editor/ authors</p> <p>Thank you for the opportunity to review this well constructed manuscript. I sincerely enjoyed working through it.</p>
