

Editor's comments:

This manuscript may be accepted after minor changes.

1) Article too lengthy it can be reduced up to 15 pages.

Author's feedback:

Dear Editor, with reference to the manuscript numbered 2018/JOCAMR/40587 , the version 2 of the manuscript is now edited as instructed. The initial 5,436 word counts are now reduced to 3,885 word counts. I need to categorically state here that the data and the results are still intact. These were not touched in the course of the editing. The necessary corrections as instructed by the editor have also been done.
