SDI Review Form 1.6

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p><b>TITLE</b></p> <p>The title needs to be rephrased, taking into consideration the <b>scope</b> of the study. Current title does not define the scope; “<b>effects</b>” is <b>vague</b>.</p> <p><b>ABSTRACT</b></p> <p>All what constitute <b>aims &amp; objective</b> should be titled “<b>background</b>”</p> <p><b>Background:</b> the aim should be clearly stated, limiting it within the scope of the study; “<b>effects</b>” is <b>vague</b>.</p> <p><b>INTRODUCTION</b></p> <p>Same observation in background above.</p> <p><b>MATERIAL &amp; METHODS</b></p> <p>I think is ok</p> <p><b>RESULTS &amp; DISCUSSION</b></p> <ul style="list-style-type: none"> <li>- It would be better to treat these two as separate sections for clarity.</li> <li>- <b>Table 1:</b> authors need to reorganize data; current presentation is not so informative. Details should be provided such as initial weights and post-intervention weights and, if possible, changes.</li> <li>- Likewise, data contained in <b>tables 2, 3, 4 &amp; 5</b> should be presented in a single table that categorizes the biochemical data (hepatic enzymes (for ASAT, ALAT...), renal function (for creatinine), lipid profile (for triglycerides, cholesterol...etc.)), groups values, and the statistical results between groups.</li> </ul> <p><b>REFERENCES</b></p> <p>A handful of references need to be updated.</p> <p><b>Attn.! I would invite authors to thoroughly revise paper for grammar, with special focus on incomplete sentences. As example from ABSTRACT:</b> “considered 10 animals per group of experimentation”( subject (<b>absent</b>) + predicate)</p>	<p>the title was changed</p> <p><b>aims &amp; objective was replaced</b></p> <p><b>RESULTS &amp; DISCUSSION were separated</b></p> <p>Table 1 was redone</p> <p>Table 2-3-4-5 was replaced by table2</p> <p>the article was revised</p>
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
