Manuscript Number:	Ms_JOCAMR_40587
Title of the Manuscript:	Effect of methanol extract of Mangifera indica on mitochondrial membrane permeability transition pore in normal rat liver and monosodium glutamate-induced liver and uterine damage.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. "The ability to modulate the life or death of a cell is recognized for its immense therapeutic potential." What does this statement mean? "Therapeutic potential" of what? 2. "It has a broad biological importance such as in cell differentiation, proliferation, regulation and function of the immune system and in the removal of defective and harmful cells." Again, this statement is very vague. What does "It" mean? 3. What is "Ajinomoto"? 4. "Results" section needs rewrite with distinct structure to present each point. 5. The figures should be re-organized. 6. The language needs intensive editing. Suggest to use professional editing service.	
Minor REVISION comments		
Optional/General comments
