

SDI Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_36743
Title of the Manuscript:	The expression patterns of APC2 and APC7 in newly diagnosed acute lymphoblastic leukemia
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The authors should provide semi quantitative results (Gel Pictures of semi quantitative PCR) for the expression of the proteins under consideration.	
Minor REVISION comments	The authors have put good effort to provide evidence at transcriptional level for the connection between ALL and the expression levels of APC2 and APC7 proteins. However the study could be more interesting if the expression level of the aforementioned proteins were connected with the expression levels of L-asparaginase in the patients examined as L-asparaginase is the main nutrient that is usually utilized by tumour cells apart from other nutrients.	
Optional/General comments	N/A
