

**SDI FINAL EVALUATION FORM 1.1****PART 1:**

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_36766
Title of the Manuscript:	Zanthoxylum species in Uganda: a novel wound healing alternative
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The paper only describe the results of wound size reduction by control (distilled water) and study medicine. Comparison of effects of ethanol and Petroleum ether fractions of the plant part is also added. The qualitative study for presence of some phyto-chemicals is performed by some very basic level tests. As I have commented earlier, wound healing efficacy study has some more parts. Anyway, the article may be accepted after correction of spelling and grammatical mistakes (many are there). It may be the decision of the Editorial board to publish the article as full research paper or at any other form.</p>
