SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The results section is incomplete, missing description of results in the text. The discussion should be rewritten, currently is written as a literature review, no discussion of results is observed. Materials and methods are written in the results section.	The result section has been revisited and necessary annotations has been made Results are already discussed with emphasis on the explanation of findings and possible reasons why the results obtained appeared the way they did Captions in materials and methods is being rewritten in results but with different explanations
<u>Minor</u> REVISION comments	Is necessary to correctly write the citations because it presents numerous mistakes throughout the document. You must type the correct scientific names, also often gender is not abbreviate. Standardize writing of the abbreviation sp. Mortalities regularly is expressed in percentages, it is necessary to make the change in the presentation of results.	This is taken care of
<u>Optional/General</u> comments	The document needs major revision, especially in the writing of results and discussion.	This is taken care of
