

SDI Review Form 1.6

Journal Name:	British Microbiology Research Journal
Manuscript Number:	Ms_BMRJ_30073
Title of the Manuscript:	In Vitro Screening of Antibacterial and Antioxidant Activities of Essential oils from four Moroccan Medicinal Plants
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This publication is very general; work discussed in this text has been performed individually in other publications. It presents good results that are no longer novel. It not discussed relations activities with the chemical composition of essential oils. It does not show the information on the chemical composition of essential oils. The introduction and the results are quite general but agree with good results. The literature is very disordered and reference missing much of the literature.	The chemical composition is not determined in this study. We have not discussed the results with chemical composition; we have just proposed that these effects could be attribute to the difference in chemical compounds of essential oils. Some actualised references are added
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
