

SDI Review Form 1.6

Journal Name:	Microbiology Research Journal International
Manuscript Number:	Ms_MRJI_32801
Title of the Manuscript:	Bacterial and Fungal Contaminants in Mycobacterium tuberculosis Cultures at National Tuberculosis Referral Laboratory-Kampala
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	It is well known that many pathogens can contaminate in LJ methods. The reviewer is not convinced which points are novel and worthy for publication. Trials to decrease the contamination and its results would be appreciated.	Culture contamination reduces the proportion of interpretable results and diminishes the diagnostic value of culture technique. It is therefore important to understand which bacteria and fungi are common contaminants of Mycobacterial cultures so as to devise means of making the media more selective against such bacteria and fungi
Minor REVISION comments	Biochemical methodology includes many well known knowledge. Hope they can shorten and cite the appropriate reference	Changes have been made as recommended by the reviewer
Optional/General comments
