SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Reviewed article describes the antimicrobial activities of methanol, hot water and cold water extracts of the leaf of <i>Emilia pratermissa</i> evaluated against organisms isolated from patients with otitis media using agar well diffusion method. It was shown that the medicinal plant could serve as medicament with a good antimicrobial effect. Chapter “2.5.1 Antifungal sensitivity test” and partly 2.6 contains a lot of imperfections - see remarks in the text of manuscript. Superscript denominations in Tables 1-3 of alphabetic character have to be unified. Literature denominations used in the manuscript have to be also unified- see remarks in the text of manuscript.	
<u>Minor</u> REVISION comments	A lot of formally predominantly language imperfection. See text of manuscript Manuscript needs a small text revision – see the remarks in text of manuscript.	
<u>Optional/General</u> comments
