SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This document is a review, therefore it should present a broader context on the situation of <i>Campylobacter</i> and the clinical impact of this pathogen. Please check the correct way of writing the bacteria's names; there are several errors in the document. - For example: - <i>Campylobacter</i> is incorrect; <i>Campylobacter</i> spp. is correct, is used when species are included. Only when referring to the genus <i>Campylobacter</i>, "spp" isn't written. The family's name <i>Campylobacteraceae</i> is written with cursive or italic letter. Written information is valuable, but information about statistics is missing. Write about the international context, and then talk about the situation in your locality. In paragraph 22 they mention Morocco, but the document didn't present information on the situation in this place (graphics, tables, figures...); complete the information about: International statistics, national statistics (in Morocco), age data, prevalence, incidence, most affected areas.	
Minor REVISION comments		
Optional/General comments
