SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	In my opinion is a good work but need to work a lot: Take care of the writing of the name of the microorganisms for example: <i>Salmonella typhi</i> should be <i>Salmonella</i> Typhi, also it is <i>Pseudomonas aeruginosa</i> . spp without italic In some paragraphs this gram with lower case and in others with capital letters the correct is Gram. Each sample should run in parallel with a negative control and a positive control with addition of DNA from a positive sample that had been previously tested. For CLSI which are reference strains? Maybe it is necessary put some imagen the PCR and NDP Test results. Needs some language corrections before being published.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
