| <b>Optional/General</b> comments    | <p>This paper presented very interesting study on the fallacy of identification by neutralization in the light of cytopathic effect non-producing enterovirus strains.. The reviewer recommends the publication with the following revision.</p> <ol style="list-style-type: none"> <li>1. There are many irregularities in English in this paper, so it should be revised seriously.</li> <li>2. Discussion part is too weak, this should be revised</li> <li>3. Conclusions must be comprehensive and not written like a report.</li> <li>4. It's very important if you added some references of 2016-2017.</li> </ol> | <ol style="list-style-type: none"> <li>1. This has been done as advised.</li> <li>2. The authors deeply appreciate the reviewer's perspective. We however want to humbly remind the reviewer that the manuscript is a short communication.</li> <li>3. This has been done as advised with consideration to Response 2 (please see above).</li> <li>4. The authors wish to bring to the reviewers notice that reference 11 (as shown below) is 2016.<br/>Faleye, TOC., Adewumi, MO, Kareem, SA, Adesuyan, YO, Fapohunda, FA, Fasanya, ST, Jimeto, T, Lawrence, OE, Obembe, AA, Adeniji, JA. The impact of a panenterovirus VP1 assay on our perception of the enterovirus diversity landscape of a sample. Journal of Human Virology and Retrovirology, 2016;4(3):00134.</li> </ol> |
