**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	<p>The aim of this study was to determine the antimicrobial activities and microbiological quality of herbal medicinal products commercially available in Port Harcourt, Rivers State. There were tested the antibacterial activity of the 40 samples against clinical isolates of <i>Escherichia coli</i>, <i>Klebsiella species</i>, <i>Pseudomonas aeruginosa</i> and <i>Staphylococcus aureus</i>.</p> <p>This may due to the fact that the methanol extraction denatures the active ingredient. The purpose of the paper is accomplished. The results are well presented and interpreted. The results could serve as a scientific base for the other pharmacological determinations. The paper is written in according to the journal requirements.</p>	Reviewer's comment is deeply appreciated. However, there was no methanol extraction of any of the herbal products evaluated but phytochemical screening was done to determine the natural constituents of the herbal products.
