| <p>In this second Revision, minor modifications were made. Accept for publication if the authors agree.</p> <p>An expert conference on Dengue in Africa was held in Accra, Ghana in February 2013, to discuss the main issues related to the possible spread of dengue on the continent. On this occasion, experts from all over the world gathered. Political priorities of actions and studies were suggested.</p> <p>The present study aims precisely at one of the guidelines of the conference.</p> <p>Make reference to the conference and discuss the results found in the light of this report strengthens the importance and the study's findings.</p> <p>In addition, it is not very understandable to ignore this event and its results, since it was based in Ghana.</p> |                                                        |
