| I tried to make comments, but the manuscript needs a careful review by the authors. 1. One example is the name of the important author Meyer-Schwickerath that was taken out of the text instead of be written the right way. 2- P value in the text does not correspond to the table, the authors write P=0.02 as a non significant level. 3- The conclusions are not suitable for the study. 4- I checked reference 10 , it is not correct. Since this is a small cohort, the authors are supposed to write a perfectly edited text in order to turn their work in an interesting and readable paper. I suggest review and re-editing by the authors. | 1-The name of the important author Meyer-Schwickerath corrected.<br>2- P value in the text correspond to the table<br>3- The conclusions are changed for the study result.<br>4The reference 10 is correct. |
