SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Only one question raised: What does "computed W index" means?	"W index" aka Waardenburg index, is a numerical value computed using a formula. In the manuscript, "W" for Waardenburg index was mentioned in Table 1. A value of >1.95 confirms the presence of dytopia canthorum or the lateral displacement of the medial canthi.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	This is a well-documented, interesting case report about a rare syndrome. The literature review is comprehensive and complete.	Thank you for your comments. It is indeed an interesting and rare case.
