SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. The microbiological protocol for Serratia Marcescens culture should be mentioned 2. The text show that sample was taken for culture and sensitivity test after 1 week of topical antibiotics treatment; did you stop treatment for 24 hours before that or not? 3. At the end patient should be referred for glaucoma specialist for further evaluation and management. 4. The references should follow journal guidelines and the international standards for cited web sites and books	1. Noted. This has been included in the text. . The discharge was cultured on Blood, MacConkey, Chocolate and Sabouraud agar and it grew on Blood, MacConkey and Chocolate agar plates. The organism was then isolated and identified using the Vitek 2 Compact identification and sensitivity machine 2. The patient had stopped all ocular medication 2 days before presentation because she was not getting better 3. She was asked to continue with her anti-glaucoma medications, continue with her glaucoma clinic follow-up 4. Noted with thanks
<u>Minor</u> REVISION comments	English language revision (missing spaces between words, capital letters)	Noted with thanks
<u>Optional/General</u> comments
