SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Interesting, clear and well-documented case report. Only one issue is not clear: After triamcinolone injection and before recurrence of macular oedema, were the radiation therapy in progress, i.e. the recurrence was induced by another radiation treatment. When was the radiation therapy stopped relatively to the presence of retinopathy? Please clarify. Is intravitreal bevacizumab an on-label therapy for this type of retinopathy in your country?	Thanks a lot for ypur comments. Our patient received and completed radiation therapy one year before the onset of radiation retinopathy. No other radiation therapy was administered since then. It was clarified in the text. Intravitreal bevasizumab is an off-label therapy as an first stage treatment for radiation retinopathy But Health Ministry in Turkey gives special permission for the usage of IVB for recalcitrant RR cases. It was clarified in the text.
<u>Minor</u> REVISION comments	In conclusion: write "treatment" instead of "threatment" and "scheduled" instead of "Scheluded".	Spelling errors were corrected in the text.
<u>Optional/General</u> comments
