

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Ophthalmology Research: An International Journal
Manuscript Number:	Ms_OR_27835
Title of the Manuscript:	Role of Optical Coherence Tomography In Macular Disorders
Type of Article:	Review article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The changes are not highlighted in the revised manuscript make it hard to see the improvements. But, as I can see, most of my comments were neglected. What was not fixed, but was required (I do not understand, why these were not fixed): 1. Not all OCT has 10 micron resolution, as you wrote. 2. A lot of typo is presented throughout the paper. The English is very poor, requiring a professional improving. 3. The style of the reference is not unified and full of typo. 4. The sources of pictures are not written. The manuscript henceforward needs a comprehensive improving in grammar. And again, it looks an unnecessary work about OCT, even as a review.
