

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Ophthalmology Research: An International Journal
Manuscript Number:	Ms_OR_27835
Title of the Manuscript:	Role of Optical Coherence Tomography In Macular Disorders
Type of Article:	Review article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. A lot of typo still presented throughout the paper. The English is very poor, requiring a professional improving. 3. The style of the reference is still chaotic, still not unified and still full of typo. 4. The pictures are not referenced in the text, the legend of the pictures are superficial, "treatments" are not specified. References are at least questionable throughout the manuscript. For example, why did you used peer reviewed papers to "Parts of the macula" or other anatomical issues? Another example: line 129, diabetic macular oedema has a reference with a title "Optical coherence tomography of central serous chorioretinopathy". And a lot of similar confusing match of text and reference are exist. A lot of reference are very old in this topic. As a reviewer, I still think that this paper is not suitable for publication.
