

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Ophthalmology Research: An International Journal
Manuscript Number:	Ms_OR_27835
Title of the Manuscript:	Role of Optical Coherence Tomography In Macular Disorders
Type of Article:	Review article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. The author does not follow the "instructions to the author" in writing the references in the text. The references should be numbered first comes first in the text and should be written in the same order under references section. This author has written the numbers of references in the order 10, 1, 3 which is not acceptable. 2. The author has not done any corrections at all (as per the comments written by the reviewer) in the revised paper. But written in the column of author's response as correction done for each comment. 3. No corrections are done in the serial number of the references in the text of the paper. 4. No corrections done in the writing style of the references. 5. Did not write the reference numbers for the subheadings of the diseases. 6. The review article must have references in support of the statements written in the paper. When corrections are done in the paper, they should be highlighted in yellow background. The author should write about the corrections done in the text against each comment so that the reviewer can find the corrections easily in the text. The reviewer has tried to help the author by writing the comments in detail so that the author can do the corrections in the revised paper. Finally, it is up to the editor's decision in this matter.
