SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Introduction Line 1 change 'allover' to 'all over' Change 'since' to 'in' Discussion Paragraph 3, include units for keratometry. For example 48 D Paragraph 5, line 1, change 'done' to 'conducted' Please provide possible explanations for your observations and possible clinical implications. For example, what are the possible explanations and clinical implications of thinner CCT observed in your population?	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	The research question posed by the authors is well defined. The methods are appropriate and well described. The data is sound and the figures appear to be genuine, i.e. without evidence of manipulation. The discussion and conclusions are well balanced and adequately supported by the data. The authors clearly acknowledge any work upon which they are building. Therefore this paper makes a significant contribution to the scientific or clinical literature of vision.
