SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The authors are stating that is rational to use moxifloxacin for irrigating solution after PCR, which is not warranted for. These cases were regular cases in an OR. They were not trauma patients. So already the risk of developing endophthalmitis is below minimal. The risk of endophthalmitis rises from the OR is limited by using bovidine preoperative. Then they did not mention any followup period that might show the efficacy of the addition of the drug.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
