

SDI Review Form 1.6

Journal Name:	Ophthalmology Research: An International Journal
Manuscript Number:	Ms_OR_37637
Title of the Manuscript:	Corneal disorders and infections: an immediate cause of concern
Type of the Article	Review article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Line 9: if you divide corneal disorders into groups, then degenerative disorders have to be mentioned besides dystrophies and infectious problems. Later, not only microbial, viral, but fungal keratitis is also known.</p> <p>Line 25: "which permits light to pass inside," is also not precise, the cornea refracts the light, not only allow to pass.</p> <p>Figure 1: the main message, so the epithelial defect is not obvious. Please change the picture or present a picture with fluorescein dying.</p> <p>Figure 2 is not linked in the text.</p>	
Minor REVISION comments		
Optional/General comments	This is a mostly well-written review about corneal infections, which is worthy for publication after minor revision detailed above.
