- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment I remember two similar paper and an editorial that deal with patients who ignore diabetes and ignore the need for blood glucose (BG) control. The argument is diffusely perceived.	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The article has a local usefulness, i.e. in south east Asia and suggest improvement in school education and improvement in awareness on diabetes.	We agree with the reviewers comment. Much needs to be done to improve the awareness. Starting early, catching them young would help improve the awareness of diabetes
<u>Minor</u> REVISION comments	I am not qualified for judging the language, however I found necessary small improvements	We thank the reviewer for the comment, We have made amendments in the manuscript as highlighted in yellow.
<u>Optional/General</u> comments	I suggest publication to help population in Singapore and elsewhere
