SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	- The aim of the study/review should be stated in the introduction; - The material and methods section should be inserted (what kind of database did you use?; which was the time period selected?; which were the inclusion/exclusion criteria for article selection?); the classification of severe ROP was the same in all studies? the International Classification of ROP was used?; - The table should contain more detailed information, e.g.: population characteristics; type of study; - "2. Genetic analysis" should be moved to introduction/discussion; - "3. Conclusion" should be more concise and short. You should construct a "Discussion section"; - Add the following reference: Ells A. et al. Ophthalmic Genet. 2010 Mar; 31 (1):37-43;	Included in the abstract as requested. All corrections are in boldface letters. Table is modified as suggested. Conclusion section is changed to discussion section and it is not shortened because other reviewer suggested that it must be expanded. A suggested reference has been included.
Minor REVISION comments	Line 47: replace "ABSTARCT" for "ABSTRACT"	Corrected
Optional/General comments	The article must be restructured according to the journal rules (Introduction, Material and methods, Results and Discussion, Conclusions).	Because it is a short review a general style has been used.
