

SDI Review Form 1.6

PART 1:

Journal Name:	<u>Ophthalmology Research: An international Journal</u>
Manuscript Number:	2013_OR_4731
Title of the Manuscript:	Genetic predisposition to advanced retinopathy of prematurity (ROP) gains support
Type of the Article	Minireview

General guideline for Peer Review process is available in this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	This review is up to date and very concise. The information contained here is useful for the readers to understand the association of genetic disposition of advanced ROP. Since very small percentage of ROP patients have mutation in Wnt signalling pathway in current studies, could the author add more information about the future direction of genetic study in ROP patients? How to clarify the association of ROP with the genetic alteration? What are the true roles of genetic and epigenetic impact on the progression of ROP?	These are mentioned under discussion in boldface letters, as requested.
