General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The manuscript is well-and understandable-written. I have only one minor concern. In Line 80; the following sentence need a revision: "Although the exact role of TCF7L2 in DR is not clearly established"	Thank you. What the statement means is the mechanism via which TCF7L2 polymorphism is related DR is not clear as reported by numerous studies, but this statement is modified.
Optional/General comments
