

SDI Review Form 1.6

Journal Name:	Ophthalmology Research: An International Journal
Manuscript Number:	Ms_OR_40354
Title of the Manuscript:	PRECISION OF ORTHOKERATOLOGY
Type of the Article	Short Communication

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The submitted manuscript generally lacks good formatting and doesn't seem technically sound. Full, clear sentences with appropriately cited sources are needed. The references are provided at the end of the work, however none of them is cited in the text. It is unclear what your original contribution is. Introduction could be more concise at the expense of more detailed next sections. It is absolutely unclear are the Fitting, Patient selection and Contraindications parts written based on your study and experience, or are all these based on reviewed and systematized guidelines from listed sources. This should be explained in the introduction. Also, the references are incomplete – for example 1 st one. This is a name of the course.	
<u>Minor</u> REVISION comments	The language of the article also needs editing, in some sentences the meaning is not clear only because of the language.	
<u>Optional/General</u> comments	Even though the article submitted is intended to be short communication, Please, read few examples of Short communication articles and rewrite your piece.
