

SDI Review Form 1.6

Journal Name:	Ophthalmology Research: An International Journal
Manuscript Number:	Ms_OR_40609
Title of the Manuscript:	EFFECT OF COLOUR VISION ON OCULAR DEVIATION
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	-Methodology is lacking critical points; did the examiner examined color vision in each eye separately or together? Vision better than 6/18 with amblyopia or not. Authors mentioned excluding deviation less than 10 prisms with deep amblyopia, what was the definition of deep amblyopia. No mention of eccentric fixation or ARC. -Discussion is so defective. Findings are not proved or explained scientifically	
Minor REVISION comments		
Optional/General comments
