

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	2014_PSIJ_14982
Title of the Manuscript:	A first order phase transition and self-organizing states in single-domain ferromagnet
Type of the Article	Original research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	None	
<u>Minor</u> REVISION comments	<p>The English grammar should be reviewed all through the text before accepting it. For e.g. in the abstract section, "...does not depend of (on) the demagnetization..." "...dynamic equilibrium state (states)..." . Also, spelling check must be done like crystal instead of crystal.</p> <p>In Introduction section, Zhabotinskiy should be Zhabotinsky.</p> <p>Also, check sections 2., 2.2 for grammatical correction.</p>	<ol style="list-style-type: none"> 1) Now in Introduction and References of the paper, there is Zhabotinsky, i.e. without "i". 2) "must be done like crystal instead of crystal". I do not know correctly, where is in paper "like crystal" 3) "Also, check sections 2., 2.2 for grammatical correction". <u>I need added time, about two weeks to edit the text in English.</u>
<u>Optional/General</u> comments	<p>This paper clearly reports on the effect of magnetic field on the first order phase transition in a single domain ferromagnet with uniaxial anisotropy. The contents are well-written and have significance in the field of SOS ferromagnets.</p>
