

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_19439
Title of the Manuscript:	High Microwave Absorption of Multi-Walled Carbon Nanotubes (Outer Diameter 10 - 20 nm)-Epoxy Composites in R-Band
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	A significant amount of errors, both typographical and phrase related, were found throughout the manuscript, sometimes transmitting confusing and unclear ideas. Also in this regard, there's a section of the paper written in italic font style, which makes little sense to the structure of the text.	We tried the best to correct any errors that we knew in the manuscript. The section of the paper written in italic font style is changed to normal font.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	One glaring omission made to the paper was the lack of references to what are likely to be the most impactful applications to date on Carbon Nanotubes Chemistry and its composites properties. References on this topics may include: Mildred Flores-Guerrero et al. (2014), <i>Designed Monomers and Polymers</i> , Vol. 17, No. 5, 416-424 Antonio Sánchez, et al. (2014), <i>Journal of Materials Science Research</i> , Vol. 3, No. 1, 1-12.	We have checked the referred papers.
