

**SDI Review Form 1.6**

Journal Name:	<a href="#">Physical Science International Journal</a>
Manuscript Number:	2015_PSIJ_21549
Title of the Manuscript:	Extending the Classic Conclusions in Lorentz Transformation for Super Natural Relativity
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

**SDI Review Form 1.6**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p>The work seems very interesting, but I think the authors should take into account recent work on the subject, such as:</p> <p>J. M. Romero, J. A. Santiago, and O. González-Gaxiola, <i>Mod. Phys. Lett. A</i> <b>27</b>, 1250060 (2012). DOI: 10.1142/S0217732312500605</p> <p>D. Bao, <a href="#">S. S. Chern</a> and Z. Shen, <i>An Introduction to Riemann–Finsler Geometry</i>, Springer-Verlag, 2000.</p> <p><a href="#">S. Chern: Finsler geometry is just Riemannian geometry without the quadratic restriction, Notices AMS, 43 (1996), pp. 959–63.</a></p>	<p>Yes, excellent papers, we have included in our references, we tends to agree with this Fractal or non-Euclidean view of the real world. If mass is not uniformly distributed in our universe, so will be the geometry.</p>
<b>Optional/General</b> comments
