SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The paper " Discussion of Time and Tide: analysis of sea level time series" investigates tide gauges. I found the topic could be a broad interest for the general audience of Physical Science International Journal. The finding could provide management implication for tide gauges. However, some points will need to be addressed:</p> <p>Abstract part is not accurate enough, the authors should elaborate it so that the reader can know the main content from it.</p> <p>Authors should reorganize the Introduction, description about “tide gauges、 sea level” should be more specific.</p> <p>Elaborate discussion and conclusion. The Conclusion did not summarize the article well.</p>	
Minor REVISION comments		
Optional/General comments
