Subject: RE: Request for evaluation of revised paper, reference number: 2014_PSIJ_14201

The author has improved the paper, and I suggest publication. However, I would like to ask the author to discuss the variations of the complex part of the scale factor and the energy density and whether there is any relation with pre Big Bang theory, some references must be included at this stage.

Besides, some references dealing with tachyonic matter are missed. I ask their adding in the references list.
