

Editor's Comment:

Some revisions of this manuscript (Ms_PSIJ_24645) were required by both referees. The author accepted the revisions and satisfied the 2nd referee that the revised manuscript can be published, while the first referee still proposed some grammatical changes. I have checked that these were made in the 2nd revision by the author, hence satisfying the conditions for publication set by the 1st referee as well.

Therefore having satisfied both referees my decision is to accept the paper for publication in Physical Science International Journal.
