

SDI Review Form 1.6

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	Ms_BJAST_23357
Title of the Manuscript:	Coupling of Laplace Transform and Differential Transform for Wave Equations
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Eq. (3.5) is not correct because the linear operator \mathcal{L} is there omitted without reason. Eq.(3.6) and (3.7) are not correct because the operator \mathcal{R} in general does not commute with the operators of the differential transform method w.r. to x .	I have gone through all the suggestions pointed out and corrected them as well.
Minor REVISION comments	Please consider the suggested corrections In Abstract: reconfirm the efficiency In Introduction: It is an iterative procedure for obtaining analytic Taylor's series solution of differential equations which was first proposed (...) by Marwan Alquran et al.[6] and it is has been successfully	I have done all the corrections.
