

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_23113
Title of the Manuscript:	XRD and SEM of Bi ₄ -xLa _x Ti ₃ O ₁₂ Ceramics
Type of the Article	Original research Articles

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	- Provide the mechanism of mixing in the early stage of ceramic preparation. - How do author can confirm the homogeneity of sample after mixing process.	- The process used in the preparation of the samples is explained in detail in the manuscript and it is highlighted with yellow. - Since mixing is done mechanically (that is ball milling) with the zirconia balls in acetone media, hence no question of inhomogeneity and even from XRD analysis it was confirmed that there is no formation of second phase.
Optional/General comments
