

SDI FINAL EVALUATION FORM 1.1

PART 1:

| | |
|--------------------------|---------------------------------------------------------------------------------------|
| Journal Name: | Physical Science International Journal |
| Manuscript Number: | Ms_PSIJ_23331 |
| Title of the Manuscript: | Preparation and Testing the Hyperthermia Property of Electrospun Micro and Nanofibers |
| Type of Article | Original Research Articles |

PART 2:

| FINAL EVALUATOR'S comments on revised paper (if any) | Authors' response to final evaluator's comments |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1-reference [13] is not cited in the text 2- The previous work in the introduction part has not a reference number or authors just general statement and the author not mention the new in this work 3- line 160 has an error (presented.IFigure) and line 194 (fibrous paper) 4- The author says: More discussion on the thermal properties of the material is added in the text. No discussion of thermal properties was added in the text? | 1 Reference [13] is cited in the revised version and some discussion is also added as a new paragraph on page 8. 2 Although the previous work is not extensively discussed in the Introduction, we made the comparison in the Results and Discussion part. The citation was added in the section of Results and Discussion. 3 The errors in line 160 and line 194 were corrected in the new version. 4 The discussion on the thermal properties was added in the text as shown in the last part of the Results and Discussion section. Please refer to page 8 for more details. |
