

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_25894
Title of the Manuscript:	The four aspects of matter and radiation
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The paper is excellent and presents correctly the concepts of Pseudotachyonic relativity, special relativity and lorentz transformation. I recommend the publication in PSIJ with minor reviews.	
Minor REVISION comments	<p>I suggest the following title for the paper:</p> <p>"The four aspects of matter and radiation in pseudotachyonic relativity"</p> <p>2. I suggest the following keywords: special relativity; Pseudotachyonic relativity; negative energy; Dirac equation; reversing time; massless particles</p>	<p>1. I wish to maintain the title "The four aspects of matter and radiation" because it is simpler and the article goes beyond pseudotachyonic relativity, mainly concerning Dirac equation.</p> <p>2. It's done for the keywords but I'll keep "De Broglie waves" because these ones appear as a kind of confirmation of the relationship between associated velocities, in pseudotachyonic theory, and, moreover, they are crucial regarding the basis of the proposed field theory.</p>
Optional/General comments
