

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_27869
Title of the Manuscript:	Natural Convective Mass Transfer MHD Flow of Chemically Reactive Micropolar Fluid past a Vertical Porous Plate
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Figures 1 B, 1e and 1d 3 a, 3 b , 3 c and 3 d must be redrawn by choosing appropriate value for η at infinity. Here numerical computation is not convergent.	Velocity sometimes decrease with increase of magnetic force. Concentration decrease with increase Schmidt number, chemical reaction.
<u>Minor</u> REVISION comments	Introduction part must be improved by citing new research papers. In this regard the following attempts may be described. <ol style="list-style-type: none"> 1. Effects of Chemical Reaction and Nonlinear Thermal Radiation on Williamson Nanofluid Slip Flow over a Stretching Sheet Embedded in a Porous Medium. 2. Effect of chemical reaction on MHD boundary layer flow and melting heat transfer of Williamson nanofluid in porous medium. 	I have changed introduction section.
<u>Optional/General</u> comments
