

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_22850
Title of the Manuscript:	Electron Inertia Effects on the Gravitational instability Under the Influence of FLR Corrections and Suspended Particles
Type of Article	Original Research Articles

PART 2:

FINAL EVALUATOR’S comments on revised paper (if any)	Authors’ response to final evaluator’s comments
1. Author has mentioned that the gas velocity is $V_x, V_y, V_z$ , but after perturbation the perturbed quantity is $\delta v$ so the components of perturbed velocity in (x,y,z) direction must be correctly written in the eqns. 10, 11, 12, and 13. 2. The left hand side of eqn 1 should be written correctly. 3. After eqn. 13 statement should be correct “The nontrivial solution of the determinant of the matrix obtained from (10)-(13) with $(v_x, v_y, v_z)$ ,” The nontrivial solution of the determinant of the matrix obtained from (10)-(13) with $(v_x, v_y, v_z)$ ,)and s .
