SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_24645
Title of the Manuscript:	Preliminary Research For Enabling Intelligent Focus For 3D Imaging
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that <u>NO</u> manuscript should be rejected only on the basis of '<u>la ck of N ov e lty'</u>, provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. There are some major issues with the written English. Please consider re-writing the abstract and closely edit the rest of the manuscript as well. 2. The introduction must be expanded a lot. It is not obvious why the work presented in this paper is needed, what it is already known in this field and what the contribution of this work really is. 3. The only equation in the paper must be re-written using an equation toolbox since it is very hard to read. Also, the equation must be explained. For instance, what is f here? 4. How does the proposed method compare with the commonly used methods? 5. It is not obvious how this method performs 3D imaging. Please explain and show results from other views.	
<u>Minor</u> REVISION comments	There are numerous places in the paper which appear to be copied and pasted which do not read well, please correct. Fig. 6 is meaningless so it could be removed. I recommend replacing 'research' and 'project'

SDI Review Form 1.6

	throughout the paper by 'paper' (since this is intended to be a published paper and not a research proposal or project).	
Optional/General comments
