

**SDI FINAL EVALUATION FORM 1.1**

**PART 1:**

Journal Name:	<a href="#">Physical Science International Journal</a>
Manuscript Number:	Ms_PSIJ_27869
Title of the Manuscript:	Natural Convective Mass Transfer MHD Flow of Chemically Reactive Micropolar Fluid past a Vertical Porous Plate
Type of Article:	Original Research Article

**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>After revision I find again:</p> <ol style="list-style-type: none"> <li><b>lack of literature review. Elaborate all these and also include few more references on micropolar fluids, free convection etc. Such as:</b> G.C.Dash, R.S.Tripathy, M.M.Rashidi, S.R.Mishra, Numerical approach to boundary layer stagnation-point flow past a stretching/shrinking sheet, Journal of Molecular Liquids, 221(2016) 860-866, S.R.Mishra, S.Baag, D.K.Mohapatra, Chemical reaction and Soret effects on hydromagnetic micropolar fluid along a stretching sheet, Engineering Science and Technology, an International Journal, Accepted(2016), R.S.Tripathy, S.R.Mishra, G.C.Dash, M.M. Hoque, Numerical analysis of hydromagnetic micropolar fluid along a stretching sheet with non-uniform heat source and chemical reaction, Engineering Science and Technology, An International Journal, 19(2016)1573-1581</li> <li><b>Physical significance of various parameters in the results and discussion section is poor.</b> <b>However, the solution procedure is interesting. Hence I think give one more chance to author so that he/she can revise the paper as per requirements.</b></li> </ol>	

**Reviewer Details:**

Name:	<b>S. R. Mishra</b>
Department, University & Country	<b>Department of Mathematics, SOA University, India</b>
