

Editor's Comment:

I have seen the submission, i.e. the manuscript Ms_PSIJ_32396 about pentaquarks. I think that the manuscript can be accepted in the final revised form.

It will be not bad if the author(s) gets acquaintance with studies dealing with the origin of quarks.

I am talking about the work:

V. Krasnoholovets, Quarks and hadrons in the real space,
Journal of Advanced Physics 5, No. 2, 145-167 (2016)
